## **ABSTRACT**

**NURROCHMA CAHYA WAHYUNINGSIH : The Correlation Between The Enrichment of English Vocabulary Through Songs and Students' Mastery in Vocabulary at The Second Year Student of SMP PGRI Arjawinangun.**

In the world the existence of language is absolutely vital, it's becoming a reflection of thought, feeling, value, culture, etc. By making use of a language the people can learn anything, to mastery a language someone must learn vocabulary.

One of the ways to build up the students motivation in learning English and can enrich their vocabulary by using song. Through song can introduce students to hear new words and they can learn synonym and antonym.

The field of the research in this thesis is vocabulary building and to approach of the research used by the writer is quantitative approach. The writer limited the problem in this on the correlation between the students' response of English vocabulary through songs and student's mastery in vocabulary at the second year student of SMP PGRI Arjawinangun.

There are some reason that the arms of this research, the first is to find out the data about the students' response of English vocabulary through songs. the second is to find out how the students' mastery in vocabulary and the last is to find out the data how the correlation between the students' response of English vocabulary through songs and student's mastery in vocabulary.

The techniques of collecting the data applied by the writer are observation, interviewed, questionnaire and test. The data is that have been collected by the writer analyzed by means of correlation product moment (quantitative data).

From the calculation of product moment correlation, the result of the correlation between the student's response of English vocabulary through songs and students' mastery in vocabulary is 0.789. it shows that the students enlarge their English vocabulary by using songs and according to Suharsimi (2002;245) it can be categorized as sufficient correlation.
