

## CHAPTER V

### CONCLUSION

After doing the research at school and analyzing the result of the research, finally the writer can draw a conclusion:

1. The boy students' achievement in English vocabulary is a little bit lower compared with the girl students' achievement. It is indicated by the lack of the interest of the boy students to English and languages in general
2. The girl students' achievement in English vocabulary is a little bit higher compared with the boy students' achievement. It is indicated by the more interest of the girl students to English, even the other languages in general.
3. The result of statistical analysis about the research comparison between the boy and the girl students' English vocabulary achievement at second year of *SMP Islam Terpadu Al Kahfi Cijeruk Bogor* is 0,202. It means that there is a positive correlation or high correlation. The average score of the boy students is 5.38 and the average score of the girl students is 5.46.
