

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the research findings in chapter four of this thesis, the writer concluded that :

1. The students' mastery of vocabulary with learning by discussion categorized comparative score. It is because the mean score achieved by them in answering the test that presented to the student is 72,85
2. The students' mastery of vocabulary without learning by discussion categorized sufficient comparative score. It is because the mean score achieved by them in answering the test that presented to the student is 69,86.
3. There is positive and significant comparative study between the students' mastery of vocabulary with by discussion. And it is known that it is known that  $t - \text{count (t - hitung)}$  is 3,59 and  $t - \text{table}$  is 2,42. It shows that  $t - \text{count} > t - \text{table}$ .

## B. Suggestion

1. Discussion is one of effective ways to learning English Vocabulary, because with discussion students can get the new words from their conversation. And in the process of teaching and learning in the class, it is better that the students also have a lot of conversation to exchange knowledge of new words.
2. Learn new word by learning by heart is not bad, because the ability of the student to remember is not same. Where some student who are easy to remember and can use any activity with the purpose to improve the student knowledge of words.
3. Better teaching and learning activities carried out in the enjoyable situation. This will make students better prepared to receive the material to be delivered. Because enjoyment is the keyword to easier absorb the vocabulary. So, the teacher have to make the enjoy, fun, and interesting in learning in order to the students can absorb the vocabulary faster and well.
