

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

After finishing this research, the researcher expected for both, teachers should be able to improve their teaching creativity in order to create the enjoyable teaching and learning atmosphere, by developing the teaching methods which are existed to be a better also fun method used. And the students might be interested then spirit to join the learning process, then they able to understand and the materials as well as possible.

And from the data analysis, it can be obtained as follows:

1. The result of the students' interest in using Word Scramble which it's obtained from the list of questionnaire given to 36 students is 74.6. This score is categorized as "*good.*" It means that the students' interest toward using Word Scramble as the teaching method is responded by "*good.*"
2. The result of the students' competence in learning English after using Word Scramble is 74.3. It is categorized as "*good.*"
3. And based on the result of data analysis and the calculation of product moment correlation between X and Y variable, the researcher get 0.73, that is categorized as "*strong.*"

Finally, from all the data calculations of DC, the level value of the

students' competence in learning English is influenced by the level value of students' interest in using Word Scramble as a method, as well as has counted before is 53.29% and 46.7% is determined to be influenced by other factors.

### **B. Suggestion**

Relating to the conclusion above, to end up writing this thesis, the researcher would like to give some suggestions, hoping that the teachers together with the students may take the advantages of it. So that the students' knowledge especially in English can be improved and they are ready to face the world and subdue it by their knowledge they have gotten from. The suggestion is as follows:

1. The students should realize that learning is not an easy thing, it always takes along time. That is why; it needs diligence and hard work. English, has many rules of a language which are sometimes looks very confused to learn it, even if the rules of a language are supposed to be the foundation of a language itself. But, from those many rules, some of them can be learnt if the students have willingness to study hard in it. If the students can master the English language well, they exactly able to communicate with foreign people or other then, finally can catch the world.
2. It is better for the English teacher should always control and monitor the students' learning progress not only in every process of teaching and learning but also in school environment. Basically, learning a language, especially English is an habit. This habit will be related with the four language skills namely, Listening, Speaking, Reading, and Writing.

That is why, for increasing students' competence in learning English, the teachers should used a good way or method to teach in order to create their interest in learning, because it can motivate them to learn it hardly. Then, by its learning hard that comes from the students' interest, they can get more knowledge particularly about English.
