

CHAPTER IV

CONCLUSION AND SUGGESTION

4.1 Conclusion

Becoming a professional teacher in the 21st century is very important because currently technology is sophisticated and the millennial generation already has the skills to operate technological equipment properly and correctly. It would be nice for teachers to understand the needs of students by using modern technology. To become a competent teacher in teaching, a teacher must have a lot of creativity and knowledge. In addition, the role of students is also very important in the ongoing teaching and learning activities.

In the findings obtained through interviews, the researchers found the fact that in the 21st century, teachers and students are required to have a strong mentality and motivation to compete in the 21st century. The 21st century has an impact on teachers and the world of education because the 21st century is the development of information technology and plays an important role in the world of education. Therefore, teachers must have the skills to operate technology in learning today, especially when online learning is being implemented. In the findings obtained, it is known that there are several applications or platforms used by T1 and T2 to conduct online learning. Some of the most important platforms are WhatsApp groups, then Zoom meetings. And some other supporting platforms are YouTube, E-Dictionary, Duo Lingo, Quizizz, and Elsa Speak.

Teachers have many roles that must be done in the process of learning activities. Teachers have a very important role in education, teachers must be able to make students want to learn. The teacher's role is all forms of teacher participation in teaching and educating students to achieve learning objectives. Teachers have several roles, such as controller, resource person, tutor/educator, evaluator, assessor, motivator. Every teacher must have some of these roles to become a professional teacher. From the findings obtained, it is explained that T1 and T2 have mastered this role because to become a professional teacher, one of the requirements is to master the role of a teacher. In the findings obtained from interviews with respondents, the researcher found the fact that the most important role of the teacher apart from being an educator is to be a motivator to generate student motivation. Motivation starts from a change in energy from within. Motivation is characterized by a reaction to the

response to achieve a goal. Motivation arises from within and from responses received from others, one of which is the teacher

4.2 Suggestion

4.2.1 Suggestion for Teachers

Researcher hopes that in the future teachers in the 21st century can establish good relationship and communication with students, because it affect the enthusiasm and motivation to learn in students. In addition, it is very important for teachers to be able to operate technology in learning so that teaching and learning activities are varied and not boring. Teachers are also expected to be good people and play an important role as parents of students in school. Researchers hope that teachers can meet the needs of students in all aspects, especially speaking skills in the 21st century.

4.2.2 Suggestion for Students

For English students, researcher hopes students can compete in the 21st century and students can operate ICT. Students have several needs in learning English, therefore the researcher hopes that students can fulfill their needs according to the learning carried out by the teacher.
