ABSTRACT

Tammimatus Silmi Aghnia. 1708103101: Teachers' Effort in Developing Their Competence in Teaching English based on the 4C Skills at SMAN 1 Losari Brebes.

Teachers as educators have a big influence in creating quality learning. In the current era of education, it is very important for teachers to be able to develop their professionalism for better learning quality. The Ministry of Education and Culture of the Republic of Indonesia has adopted 4C skills in the development of the 2013 curriculum revision as a 21st century education concept (Rizkiah, 2020, p. 2). Learning in this century leads to the competence of teachers to be able to apply 4C skills in the teaching and learning process. The condition that occurs is a challenge for teachers to be able to develop the quality of their profession in teaching. Based on the phenomenon, this study aims to know the efforts of teachers in developing their professionalism in teaching English and the application of 4C skills into learning. This study involved 2 English teachers and 6 students. To achieve this goal, the author uses a qualitative descriptive method with data collection techniques through interviews. Data analysis consists of data reduction, data display and data verification. The research findings show that 1) there are four teacher competencies that have been developed. There are pedagogical competence, personal competence, professional competence and social competence. 2) 4C skills are applied by providing challenges for students to explore, using technology, providing problems, team work, and training students in interacting.

Keywords: *teacher professional development, teacher's competence, 4C skills*
