## ABSTRACT

*Afra Dilla Sausan. 1808103073. Developing AutoPlay-based Media for Learning Asking and Giving Suggestions at Senior High School.*

The educational field has shifted from traditional classroom settings primarily using printed learning resources to a technological-based learning system. This study was intended to develop AutoPlay-based media for learning Asking and Giving Suggestions at Senior High School. The purpose of this study is to find out the characteristics of AutoPlay-based media and develop the AutoPlay-based media for learning speaking. This study employed a qualitative approach using the R&D method with ADDIE (Analyze, Design, Development, Implementation, and Evaluation). Due to the limited time, the researcher only adapted three steps from the ADDIE model development: analysis, design, and development, including expert judgment. The primary data source for this study comes from journals, articles, books, and others while the secondary data comes from English teachers. The researcher gathered data through a literature review and interviews. The English teacher is a participant in this study. From the results of the need analysis, there are 12 characteristics of AutoPlay-based media for learning speaking. The researcher developed AutoPlay-based media based on 12 characteristics have been found in the need analysis. For AutoPlay product development, the researcher determines the software used, adjusting core competencies and basic competencies based on the 2013 curriculum, designing learning objectives, preparing materials in the form of PowerPoint slides, designing, speaking assessment, publishing materials with iSpring application, presented a description of the AutoPlay-based media product, expert judgment, then revised the product. The developed AutoPlay is validated by experts and then repaired by the researchers in accordance with expert suggestions and input.
